ATM PROGRAM

```java
package ExampleProgram;

import java.util.Scanner;
class InsufficientBalanceException extends Exception
{

}

public class ATM {

    public static void main(String[] args) {
        Scanner s = new Scanner(System.in);
            int balance = 10000;

System.out.println("Enter amount to be withdrawn :");
            int amount = s.nextInt();

            if(amount <= balance)
                {
    System.out.println("Withdrawal successful");
                }
                else
                {
                try
                {
    throw new InsufficientBalanceException();
                }
        catch(InsufficientBalanceException e)
                {
System.out.println("Not enough balance to withdraw!:(");
                }
                }

                }

                }
```

OUTPUT

Enter amount to be withdrawn :
5000
Withdrawal successful
